

KAUSHALYA THIMMA JEYAPRAKASH

Entry-Level Software Developer | React.js | Java | Python | ML

Mail: kaushalyakausi001@gmail.com · **LinkedIn :** linkedin.com/in/kaushalya-tj · **Mobile no:** 9363382336

PROFESSIONAL SUMMARY

MCA graduate with hands-on experience in React.js, React Native, Java, Python, and Machine Learning. Developed real-world web and mobile applications including a timetable scheduling system and a diabetes prediction platform. Skilled in frontend development, data preprocessing, and REST API integration. Passionate about building scalable applications and eager to contribute as an entry-level software developer.

TECHNICAL SKILLS

- Languages:** Python, JavaScript, Java
- Frontend:** React.js, React Native, HTML5, CSS3
- Mobile Development:** Flutter
- Backend Basics:** Flask, REST APIs
- Databases:** MongoDB, PostgreSQL, MySQL
- Machine Learning:** Pandas, NumPy, Scikit-learn, Data Preprocessing, Model Evaluation
- Tools:** Git, GitHub, VS Code
- Cloud & Platforms:** AWS Basics, Firebase

INTERNSHIP EXPERIENCE

Mobile App Development Intern (Flutter UI) — Abservetech Pvt. Ltd., Madurai

Duration: 1 month

- Developed responsive mobile UI screens using Flutter widgets and navigation components.
- Improved application usability by maintaining consistent UI/UX design patterns.
- Collaborated with team members to create wireframes and prototype-based application flows.

Data Science Intern — Embark Interactive Solution

Duration: 3 months

- Performed data preprocessing and exploratory data analysis on healthcare datasets using Python.
- Assisted in building and evaluating machine learning models for predictive analysis.
- Visualized model insights and dataset trends to support data-driven decision making.

PROJECT

Timetable Scheduling Application —React Native, JavaScript, Firebase

- Developed an Android application to generate automated class timetables for colleges.
- Implemented conflict-avoidance scheduling logic to prevent teacher and class overlaps.
- Designed responsive UI screens for admin, student, and teacher modules.
- Integrated timetable generation logic with dynamic scheduling constraints.

Diabetes Prediction Web Application — Python, Flask, Scikit-learn, Pandas, React

- Built a machine learning-based web application to predict diabetes risk from user health inputs.
- Applied data preprocessing, feature selection, and model evaluation using Scikit-learn.
- Developed frontend pages for user authentication, prediction results, and recommendations.
- Integrated ML model with Flask backend for real-time prediction functionality.

EDUCATION

MASTER OF COMPUTER APPLICATION - Fatima College, Madurai 2023-2025

BACHELOR OF COMMERCE - Fatima College, Madurai 2019-2022

CERTIFICATIONS

- Young Professional — TCS iON
- Google UX Design Certification — Coursera
Completed modules in wireframing, prototyping, empathy mapping, and user-centered design.

CURRENTLY EXPLORING

REST API | Data Structures & Problem Solving | Spring Boot | Data Analytics & Visualization | Cloud Computing (AWS Basics)
